

SENIOR FULL-STACK + AI ENGINEER

Anthony B. Tedesco

Senior Full-Stack + AI Engineer

I ship production systems end-to-end — schema to k3s, mobile to model.

POSITIONING

Building for clients and my own ventures since 2019 — six years of public git history in lieu of a CS degree. I've architected entire platforms solo or two-handed: cross-platform apps, real-time distributed backends, applied computer vision, on-chain provenance, multi-tenant Kubernetes, and the analytics pipelines that connect them. Operator-first UI bias — dense control surfaces over marketing chrome.

SELECTED WORK

Verified Fishing, Inc.

Founding Engineer

Apr 2026 - Present · Delaware C-Corp · derby.fish

Full-stack mobile platform plus AI catch-verification for competitive fishing, **built end-to-end by two engineers** across 20+ repos. One Expo / React Native / Next.js codebase ships to iOS, Android, and web over real-time Python + Node.js WebSocket APIs. AI verification stack (YOLO + OpenAI Vision over a 419-species DB), on-chain Fish Cards on Flow, and a 279-migration data layer (100+ tables, 300+ RLS policies) feeding a 40-model dbt medallion exposed to AI agents over MCP.

AGFarms LLC — Nucleus Brain

Founding Engineer · 50/50

Mid 2024 - Present · venture studio · agfarms.dev

Author of record on the studio's production portfolio. Built **Nucleus Brain** (open-source, 2,216 commits) — an agentic-infrastructure platform with native MCP transport (Claude / Anthropic / OpenAI), a real-time NodeGraph, RAG retrieval, CronJob agent passes, and a Neo4j knowledge graph — deployed on a hand-rolled **k3s cluster** (Hetzner, 15+ namespaces). Also the Walleye Fest tournament portal (Rust + Next.js) and studio products (Happy Swims, Patagonia Moto, AGFPay).

Roley Inc.

Founding Engineer · solo

2023 - 2024 · casting-automation SaaS · 14 repos

Started the company alone and wrote every line. A fleet of ephemeral applier agents podded into Docker and orchestrated on a Kubernetes setup I built auto-applied to acting roles across fragmented casting platforms. Actors loved it; the platforms blocked the bots into the ground. `messenger-roley` alone: 1,522 commits.

Interactive Patagonia SpA

Co-operator

2025 - Present · LATAM operations

Built and run the full booking suite for a bike & motorcycle rental fleet — Segway Xyber, e-bikes, and motorcycles — for a Chilean SpA at the bottom of Patagonia.

Toll Road Music (ETHGlobal Buenos Aires) — pay-as-you-go streaming on x402 + Filecoin + Coinbase embedded wallet · **PUQ City** — digital-city platform: React Native 0.81 / Expo 54, Dynamic Labs passkey wallets, Solidity, Uniswap V4 SDK, Mapbox.

SIGNALS

Full-lifecycle owner

Schema (279 migrations) → API (TS/ Node + Python + Rust) → mobile (Expo) → admin consoles → CI/CD → deployed infra.

One codebase, three platforms

iOS, Android, and web shipped from a single Expo / Next.js source.

AI-native by default

YOLO + Vision verification, MCP servers, and agent orchestration in production — not demos.

TECHNICAL RANGE

Languages	TypeScript, Python, SQL (PostgreSQL / PostGIS / TimescaleDB), Rust, Go, Solidity, Bash
Backend & data	Node.js, WebSockets, FastAPI / Express, Supabase + Edge Functions, dbt medallion pipelines, applied CV (YOLO + Vision APIs), AWS IVS / Rekognition
Frontend	React Native (Expo SDK 54), Next.js 14/15, React 19, Tailwind, Three.js / R3F, Mapbox
AI & web3	MCP transport (FastMCP), Claude / Anthropic / OpenAI SDKs, Nucleus orchestration (NodeGraph + RAG + agent CronJobs); Flow NFTs, x402, Filecoin, Hardhat, Uniswap V4, Dynamic Labs
Infra	Live k3s cluster (Hetzner, 15+ namespaces, traefik, StatefulSets, CronJobs), Docker / Helm, nginx, GitHub Actions, Linux (Fedora)

WHAT I'M LOOKING FOR

Remote-first — full-time or contract, available immediately. US-hours compatible and comfortable across US and LATAM time zones.

anthonybtedesco@gmail.com · mattrickslauer.com · github.com/mattrickslauer · github.com/AGFarms

Self-taught — years of building original products end-to-end, from first idea to production. References and a deeper portfolio available on request.
